12 VOLT

FL5B "Bel Air"

The Bel Air's graceful lines and stylized bell shade offer a more traditional alternative to the Amaryliss. The artistic styling combined with precise machining and assembly results in a pathlight of exceptional quality. It is mechanically superior to other luminaries of similar style. Careful lamp placement and an open shade provide profuse light output of soft, warm light. The Bel Air is the perfect luminaire to tuck into densely planted garden areas bordering lawns or walkways. The light is directed forward and down onto paving, with enough backlighting to highlight bedding color and adjacent accents. Ideal spacing would be from 10' to 20' on center with 15' being the perfect balance between economy and performance. Ground stake assembly and 12 volt 18 watt lamp are included. 20 watt halogen lamp also available.
