

# 25 YEARS OF EXCELLENCE

At Auroralight, we believe that excellence doesn't just happen; it requires vision, careful planning, extensive testing, and meticulous execution. From our vision in 1996 of creating the perfect luminaire to the engineering and production of our current product line, excellence has been our benchmark.

This focus has resulted in a complete family of products, each excellent in every way.

Delivering Lifetime Lighting Solutions  
for a Quarter-Century

New Pathway & Directionals

## KODIAK

LSL30

The all-new LSL30 Kodiak is a high-performance and high-efficiency floodlight, lab certified at over 100 Lumens per watt at 3000K. The LSL30 is: built upon our Copper Core® platform, Thermally Integrated®, and self-regulated for peak performance and longevity in any climate.

### Exclusive Kodiak Features

- 12, 14, or 16 Watts, up to 1,445 Lumens at 14W
- Four Interchangeable Optics from 12° to 60°
- Solid Brass with Copper Core Technology®
- Thermally Integrated® and Self-Regulated
- Storm Drain™ Lens Drainage System
- Aurora Mount System (AMS™) Compatible
- Completely Field Serviceable

## TELLURIDE

HRL16

The newly re-designed Telluride HRL16 utilizes our latest “Designer Series” light engine that features six interchangeable optics and four LED modules from 260 to 677 Lumens. A discrete but robust wall mount attachment includes a threaded adapter for cover plates or ground stakes. The HRL16 is designed for easy installation under eaves or on walls and structures. With a multitude of options, the HRL16 will meet any lighting challenge.

### Exclusive Telluride Features

- 4, 6, 8, or 12 Watts, up to 677 Lumens
- Six interchangeable Optics from 20° to 75°
- Solid Brass with Copper Core Technology®
- Thermally Integrated® and Self-Regulated
- Storm Drain™ Lens Drainage System
- Completely Field Serviceable

## MARTILLO

LMPL

The LMPL Martillo Path Light is a stylistic LED luminaire featuring a sleek, precisely sculpted brass body and stem. A Cree® powered Copper Core® light engine and precision-machined optics combine to create dazzling glare-free illumination. Incomparable engineering, materials, and innovation put the LMPL in a class of its own. Influenced by current architecture, the Martillo is the perfect complement to modern, contemporary, or craftsman architectural stylings.

### Exclusive Martillo Features

- 3, 4, or 6 Watts, up to 250 Lumens
- Precision Machined Acrylic Optics
- Glare-free illumination: BUG Rating B0 U0 G0
- Solid Brass with Copper Core Technology®
- Thermally Integrated® and Self-Regulated

## GIZA

LPL5-SQ

The LPL5 Giza, named after the City of Pyramids, features a bold upright posture with craftsmanship worthy of its pedigree. Protected inside is our exclusive Cree® powered Copper Core®, Thermally Integrated® LED light engine. By night, light exudes from under the heavy cast bronze louver delivering glare-free illumination. Giza: bold styling, superior materials, mechanical innovation; pure engineering-bliss.

### Exclusive Giza Features

- 6 Watts, up to 190 Lumens
- Precision Machined Acrylic Optic
- Glare-free illumination: BUG Rating B0 U1 G0
- Solid Brass with Copper Core Technology®
- Thermally Integrated® and Self-Regulated

## OMEGA

HSL20

The HSL20 Omega borrows the best features from over five generations of our classic workhorse SLX16 series fixture. The HSL20 is sleeker, more compact, and 30% lighter than our HSL16. It is offered in 2 versions: The LM Features our newest Designer Series LED module (260 to 677 lumens) or the XO version for maximum economy utilizing retrofit MR16 options. With many lamp and mount possibilities, this luminaire can do it all.

### Exclusive Omega Features

- 4, 6, 8, or 12 Watts, up to 677 Lumens
- Six interchangeable Optics from 20° to 75°
- Solid Brass with Copper Core Technology®
- Thermally Integrated® and Self-Regulated
- Storm Drain™ Lens Drainage System
- Completely Field Serviceable
- Aurora Mount System (AMS™) Compatible
