

PB POWER BOX

The **PB Power Box** is part of the most comprehensive mounting system available. Machined entirely from solid brass with a removable top assembly is a low voltage lighting junction box combined with an electronic transformer listed to UL STANDARD: 1838. This unit can be buried within 1" of the top, even in exterior wet locations. The PB adapts from line voltage feed (120v) to most of our low voltage (12v) fixtures and most 12v fixtures from other manufacturers. The optional PVC stabilizing stake or stainless steel trident spike adds significant strength, ensuring a safe and durable installation. The PB accommodates two 1/2" bottom entry conduits allowing for 12v output for a second fixture up to 10' away or 120v through wiring.

ORDERING GUIDE: ^{Prefix} **PB** P (POWER) B (BOX)

□ INDICATES REQUIRED FIELD □ INDICATES OPTIONAL FIELD ✓ INCLUDED IN BASE PRICE

CONFIGURATION

- [B]** Box Only ✓
- [S]** Box w/ PVC Stake
- [TR]** Box w/ 9" Trident Spikes

Note: Includes 60W 120-12V AC Electronic Transformer. Consult factory for other voltages.
