

MC45 MOUNT CANOPY

The **MC45 Mount Canopy**, part of an entire family of canopies from Auroralight, offers a stylish and durable way to mount fixtures. The MC45 is designed to fit all STANDARD: 3" or 4" round, flush-mounted electrical service boxes. The solid brass body and gasketed escutcheon machined from solid brass offers maximum corrosion resistance and ensures a tight seal where it joins the mounting surface. The MC45 also features a proprietary screwless faceplate that eliminates twisted wires and visible mounting hardware. It is available in shallow or deep versions with a choice of 1 or 2 hole mount plates, allowing the MC45 to be used in single or double fixture configurations.

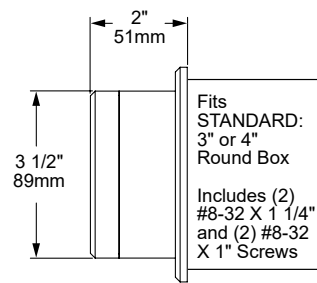

MC45-2-D-BLP

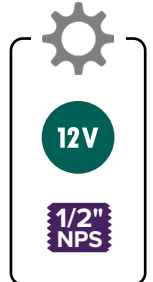

MC45-1-S-BLP

[S] Shallow (6 Cubic Inch)

[D] Deep (10 Cubic Inch)

Adapter Plate (included)
for mounting to
